

Mr. Panagiotis Ktenas has a BSc in Mechanical Engineering and another one in Economics. He served for 23 years as an Engineer Officer in Hellenic Navy reaching the rank of Lt.Cdr. From 2015 onward, he left active service and moved on to private sector at his own request. During his career, he has served in a variety of managerial positions in the fields of project management, budgeting as well as in personnel administration and technical supervision. He further expanded his academic horizons with an MSc in Urban Design and an MA in International Relations and Diplomacy, being an alumnus of Fletcher School, Tufts University (USA). He has shown a passionate interest in North Korea's tailor-made development and gradual reintegration in a globalized economy, participating in relevant projects. He is a certified adult trainer with extensive experience in IT, presentation skills, storytelling, and SHELL Resilience program. He is strongly interested in exploring the applicability of new technologies in the maritime sector such as the autonomous ships and the use of drones. Currently, he works as an HSQE / Quality Manager in a maritime tanker company stationed in Athens.
